

MoVerse Whitepaper

February 28, 2025

1. Introduction

MoVerse is a decentralized Web3 trading ecosystem powered by blockchain, artificial intelligence (AI), and non-fungible tokens (NFTs), designed to redefine global trading. Inspired by Eastern "Mo" culture, we offer low transaction fees of 5%, delivering an efficient and transparent platform. MoVerse will launch in March 2025, starting with creative services trading (e.g., digital art, design services), with plans to scale to all legal trading scenarios.

2. Vision and Goals

- Short-term (2025-2027): Achieve ¥100M in transactions, lead the creative trading sector.
- Mid-term (2027-2030): Reach ¥1B in transactions, expand into mobility (e.g., shared transportation) and delivery services.
- Long-term (2030-2035): Surpass ¥10B in transactions, become a cornerstone of the Web3 economy.

3. Token Economics: Mo

Mo is the core token of MoVerse, used for governance, payments, and incentives.

- Total Supply: 15 million Mo.
- Allocation: 50% presale, 25% team, 25% ecosystem development.
- Earning Methods: Trading rewards (40%), fiat exchange (40%), staking rewards (20%).
- Fees: 3-6% transaction fees, with 40% burned to reduce supply.

4. Governance Structure

MoVerse is governed by the Mo Council with a dynamic structure:

- Legislative Seats: Elected by top Mo holders and community votes.

- Executive Seats: Composed of industry representatives, users, and AI.
- Supervisory Seats: Audit nodes ensure transparency.

AI optimizes proposals, and NFT-based voting guarantees fairness.

5. Join Us

MoVerse welcomes early supporters and contributors:

- Investors: Fuel the decentralized future.
- Talent: Blockchain developers, AI experts, and operations staff to build together.
